DANAGE DOMINO MODULAR TARGET SYSTEM

Move-Flip-Rotate

The Basic DOMINO advantages – for top economy:

- A Move** for maximum "lifetime"
- B Flip** – shoot on both sides (XHD and X-XHD foam)
- C Rotate** each Domino Cube for more arrows

Shooting a recurve bow at 70 metres, you will get a minimum of 6000 arrows in each 44x44 cm XHD cube.

132 x 132 cm / 52 x 52"

"The decision to invest in the DANAGE DOMINO targets was from the first BERLIN OPEN in 2010 mainly to ensure the best possible targets for the archers. We have now after 6 tournaments experienced more advantages; e.g. very good "lifetime" = good economy, easy maintenance and also easy transport and installation."
Carsten Rauchhaus, Vice President BSB BB Berlin, President Org. Team Berlin Open (Germany)

"We find the Danage Domino bosses very good value for money. All in all we had 12 tournaments + more than hundreds practise shootings before the targets had to have segments replaced."
Eric Jackson, Treasurer, Wellingborough Open Archery Club (UK)

528 x 132 cm / 208 x 52"

"We have now for 3 years been shooting on our Danage Domino Shooting Wall - and have not yet replaced any modules. Also important, the renovation (moving the modules) of the total shooting wall is done within 60 - 90 minutes - and that is highly appreciated by the archers."
Goran Karlson, President, Karlskrona Bagskyttar, (Sweden)

PowerStop

132 x 132 cm / 52 x 52"

"All in all we highly recommend using Danage PowerStop and of course also the Danage Domino targets."
Steen J. Jørgensen, President TIK Archery, Taastrup (Denmark)

World Cup Final 2009, Copenhagen. Warm up targets at Rosenborg Castle.

"After three indoor World Cups, one indoor World Archery Championship, and thousands of accurate shots, we are very happy with the "lifetime" and the easy maintenance of the targets, so happy that we also use them in training."
Olivier Grillat, Arc Club de Nimes (France)

88 x 88 cm / 35 x 35"

"It is so pleasant to shoot Domino Targets; I can really recommend them to all archers."
Nets Mertens, Trainer DAE (Belgium)

44 x 66 cm / 17 x 26"

"Test overall satisfactory as indicates that Danage Targets can be used at 18m indoors as effectively as other systems while being lower maintenance and more environmentally-friendly."
M.-F. Dufour RA Archery Club, Ottawa (Canada)

88 x 88 cm / 35 x 35"

44 x 44 cm / 17 x 17"

PowerStop

66 x 66 cm / 26 x 26"

"The DOMINO PowerStop is the secret behind why our foam is still the original one, meaning we save investing in spare parts, no time is spent on maintenance and, more importantly, we have peace of mind because we are certain the tournament schedule will be followed. In short, economical and stress-free."
Anette Hedvall, Treasurer, BK Dalpilen, Borlänge (Sweden)

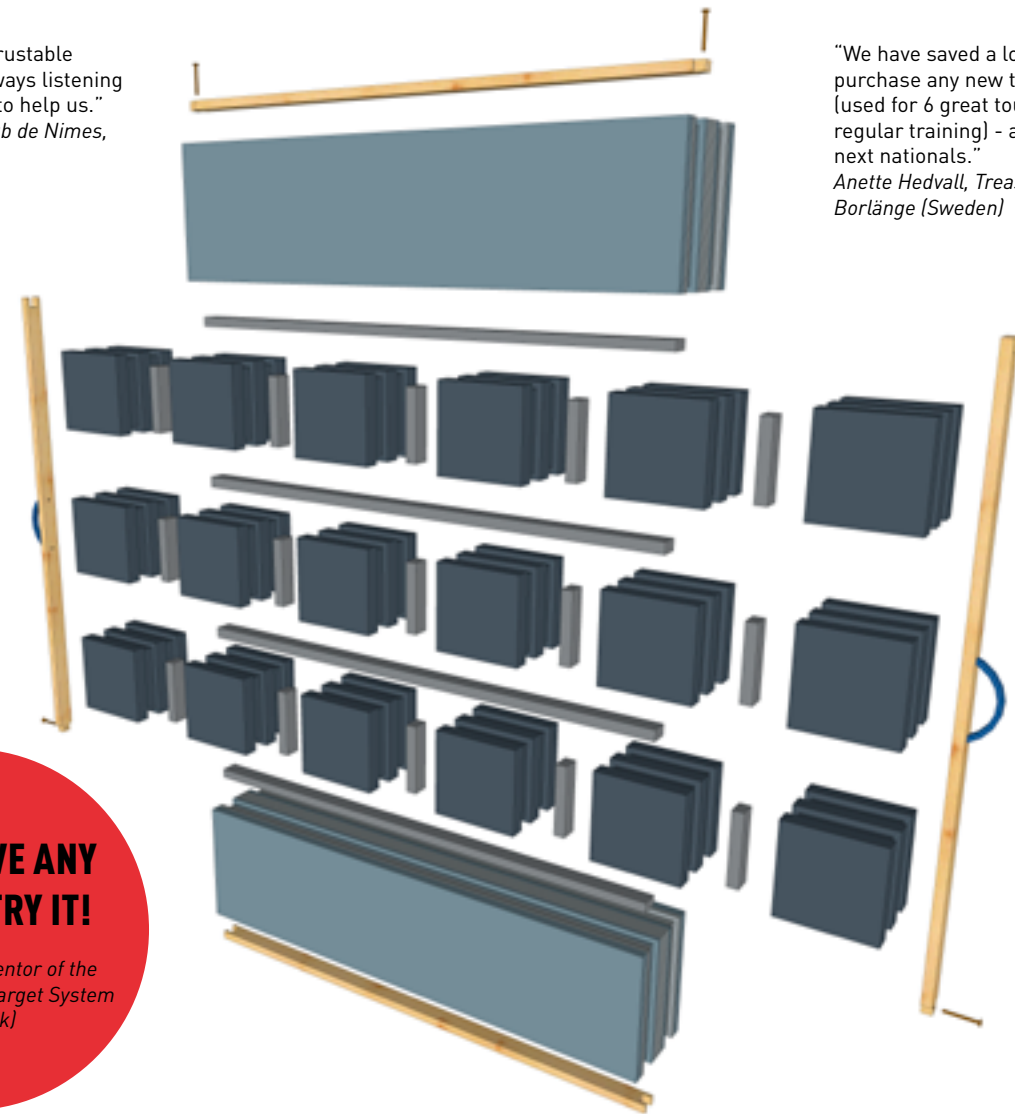

"Archers can enjoy pulling out their arrows without damaging their points and arrow surface. Archery clubs can easily build shooting ranges and easily replace worn out parts making the Domino Targets very economical in use."
Miroslav Bojcun (Slovakia)

DANAGE DOMINO MODULAR TARGET SYSTEM

Anything is possible

"DANAGE is a very trustable partner; they are always listening to find the best way to help us."
Olivier Grillat, Arc Club de Nimes, (France)

"We have saved a lot not having to purchase any new targets for 10 years (used for 6 great tournaments + all regular training) - and still ready for the next nationals."
Anette Hedvall, Treasurer, BK Dalpilen, Borlänge (Sweden)

IF YOU HAVE ANY DOUBT - TRY IT!
Erik Kornbek, Inventor of the DANAGE DOMINO Target System (Denmark)

The basic foam of the DANAGE Archery Targets is expanded low-density polyethylene PE foam. The manufacturing process is free from ozone damaging CFC's and HCFC's. When incinerated, the PE foam produces a high calorific value without any harmful gas emissions. The waste disposal plants should receive the worn out foam modules without problem.
